

Coated specialty papers for the worldwide label & packaging industry

To produce high quality labels and packaging products you need high quality coated specialty papers. Only then, using modern printing and finishing systems, can excellent end products be created that will satisfy the most demanding customers.

Mitsubishi HiTec Paper, based in Germany, offers a large range of excellent coated specialty papers; worldwide and for a variety of applications; for digital, but also for traditional printing processes. Mitsubishi works constantly on product improvements, new products and innovations.

THERMOSCRIP™ direct thermal papers: In the wake of the ban on BPA (from 2020 in Europe), the demand for phenol-free thermal paper is rising significantly. Mitsubishi has been using phenol-free developers for thermal papers from 48 to 257 gsm for many years; with and without topcoat; for labels, receipts or tickets, including integrated security features. Linerless is a fast-growing label segment, especially when it comes to logistics or on-demand retail solutions. The LL 77 series thermal papers, launched at Labelexpo Europe 2017 in Brussels, offer a cost-effective linerless solution; also phenol-free of course.

JETSCRIPT™ inkjet papers: As a leading manufacturer of coated inkjet papers, Mitsubishi is constantly developing these products. Against the backdrop of ever faster inkjet printing systems and the required compatibility of the media with all common inks the demands on inkjet papers are growing. Mitsubishi naturally fulfils the requirements thanks to the special surfaces and properties of the JETSCRIPT products. Mitsubishi will be presenting samples of a JETSCRIPT product innovation to selected visitors at Labelexpo Americas 2018.

GIROFORM™ carbonless papers: with GIROFORM DIGITAL ONEforALL, Mitsubishi has been offering a universal carbonless copying paper specially developed for digital printing since 2016. Personalized, individual forms and documents are no longer a problem with this 80 gsm (21 #) carbonless paper. ONEforALL is certified by HP Indigo and is suitable for all current digital toner printing systems, black & white copiers etc. With its explanatory films, for example on fanapart gluing, Mitsubishi offers the best technical service.

BARRICOTE™ barrier papers for food packaging: with this new business segment, Mitsubishi offers brand owners, food retailers and packaging industry particularly sustainable and effective barrier solutions for food packaging. The range comprises paper products made from virgin fibres and water-based coatings. With a total absence of plastic films, aluminium, extruded polymers, varnishes or laminates as well as fluorocarbons, BARRICOTE papers offer effective protection against mineral oils, grease & oil and water & water vapour. Of course, all products are approved for food contact, FSC® Mix and PEFC™ certified and recyclable. Applications are, amongst others, heat-sealed and cold-bonded pouch papers, laminating papers for cardboard and paperboard as well as wrapping papers.

High-tech storage at Mitsubishi's Flensburg mill

Mitsubishi HiTec Paper offers coated specialty papers of the highest quality, Made in Germany, delivered to all continents reliably and consistently. On-site sales contacts are available to customers as well as an excellent technical service. Regional warehouse solutions ensure a constant availability of the products; fast, safe and worldwide.
